husainbardanwala65@gmail.com | github.com/HusainMain | leetcode.com/u/W9RFMcxTXL/

SUMMARY

Computer Engineering student at SVIT building full-stack, AI-enabled products. Shipped projects end to end, led a four-person team to a state-level hackathon final, and completed AWS Academy Cloud Foundations at 82%. Seeking a software engineering internship.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Engineering, 2024 – 2028 | Vasad, India
Sardar Vallabhbhai Patel Institute of Technology (SVIT)
Affiliated with Gujarat Technological University (GTU), CGPA: 8.48 / 10

TECHNICAL EXPERTISE

- **Programming Languages:** C, Java, Python, JavaScript, HTML, CSS, SQL
- **Frameworks & Technologies:** React, Node.js, Express, MongoDB (Atlas)
- **Data:** pandas, NumPy, Matplotlib, Seaborn, Jupyter
- **Cloud & Storage:** AWS, Supabase, Vercel, Render
- **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming, Database Management, Operating System.
- **Professional Strengths:** Leadership, Team Collaboration, Technical Communication, Adaptability

PROJECTS

IdeaBridge, *AI Startup Validation Platform*
React 18 · TypeScript · Express · Groq · Three.js · Zustand · Tailwind
- Four-step founder intake to an Express API returning SWOT, competitor analysis and a readiness score.
- Cached and rate-limited every call; failures return mapped error codes, never raw exceptions.

github.com/HusainMain/ideabridge

iEMS, *Role-Based Education Platform*
React 19 · Firebase · Tailwind CSS
- Admin, teacher and student surfaces over one Firestore dataset, shipped in 24 hours.
- Access enforced in Firestore rules with a default-deny catch-all, not hidden in the client.

github.com/HusainMain/iEMS

IPL Match Analysis, *1,095 Matches, 260,920 Deliveries*
Python · pandas · NumPy · Matplotlib · Seaborn · Jupyter
- Reconciled 19 team names to 15 franchises and filled 1,160 missing values column by column.
- A validation pass caught a win-tally chart that was silently dropping all 14 tied matches.

github.com/HusainMain/IPL_Analysis

BuildEx, *Official Club Website*
React 19 · TypeScript · GSAP · Tailwind CSS · Vite
- Canvas-drawn hexagonal hero and pinned-scroll narrative, with events and gallery fed from data modules.
- Honours prefers-reduced-motion throughout; animated sections resolve to their end state.

ACHIEVEMENTS

Finalist, *CVMU Hackathon 4.0 (state-level)*
Led a four-person team from problem statement to a working platform in 24 hours. Owned authentication, the role-based data model, and default-deny security rules across three role-based dashboards.

AWS Academy Cloud Foundations, *Training Badge*
Completed the AWS Academy Cloud Foundations course delivered through SVIT, finishing with a consolidated score of 82% and the AWS Training and Certification badge. Covered the core service families — compute, storage, databases and networking — along with the pricing and scaling model beneath them.

LeetCode, *Data Structures and Algorithms practice*
Continuous practice across arrays, strings, two pointers, trees, hash tables and dynamic programming, solved primarily in Java and Python. The set covers searching, sorting, two-pointer passes, in-place manipulation and dynamic programming.
